NEW!!! TSR2000 Series Dispensing Robots

Techcon Systems is pleased to introduce the new line of TSR2000 Series bench-top dispensing robots. The new robot series is easy to program, simple to operate, and compatible with all valve types and controllers.

The versatile TSR2000 dispensing platforms deliver consistent, high performance dispensing results at an affordable price. These dispensing robots are ideal for applications such as: dispensing dots of solder paste, form-in-place gasket, filling, potting, encapsulation, bonding, coating and many more.

Designed and configured specifically for fluid dispensing applications, Techcon Systems robots provide total control over fluid placement, from beads, arcs and circles to repeated timed dots. Programming is simple via teach pendant.

From a general assembly manufacturer looking to automate an existing dispensing application to an engineer designing a production process from scratch, Techcon Systems dispensing robots offer unsurpassed value in automated precision fluid dispensing.

The bench-top dispensing robot series are available in 3 platforms:

- TSR2201: 200mm X 200mm working area
- TSR2301: 300mm X 300mm working area
- TSR2401: 400mm X 400mm working area

Light beam safety cover for each model is available to meet CE safety requirement:

- TSR2200-SC = Safety cover for TSR2201
- TSR2300-SC = Safety cover for TSR2301
- TSR2400-SC = Safety cover for TSR2401

The new robot series is available for ordering on April the 15th, 2014 with a standard lead time of 2 weeks.

Please contact your regional sales manager for pricing information.
